Jie Cai

My research lives at the intersection of computer science, social science, and science and technology studies. My primary focus areas are human-computer interaction (HCI) and computer-supported cooperative work (CSCW), with interests in interactive media, marginalization, accessibility, harassment, and content moderation. I also have a broad interest in digital technology. I applied qualitative (e.g., interview, observation) and quantitative (e.g., survey) methods with sociotechnical theories to understand user mental models and behavioral patterns and provide design interventions to improve user experience.
